

AIR CONDITIONING SYSTEM SERVICE

AVOID EXPENSIVE REPAIRS

To avoid expensive repairs have your AC system check with your service advisor for proper maintenance.

**USE PROTECH® AC SYSTEM SERVICE AS A PART OF YOUR REGULAR MAINTENANCE SCHEDULE
SERVICE EVERY 15,000 MILES OR MANUFACTURER'S RECOMMENDED SCHEDULE SERVICE.**

**AC SYSTEMS NEED
PERIODIC MAINTENANCE**

THE PROBLEMS

Automobile AC systems perform a tremendous amount of work under very high heat conditions. This is true during summer months where AC system pressures can reach over 300 pounds per square inch with temperatures exceeding 250 degrees Fahrenheit. In this environment AC Systems seals are put under extraordinary strain and the AC lubricant is stretched to its limit utility particularly in high heat climates.

As the AC system seals age and harden allowing increase refrigerant loss AC system performance reduces at the same time the lubricant can breakdown under stress. AC systems need periodic maintenance to replace lost refrigerant, protect and condition aging seals, and clean built up residue.

**PROTECH AC SERVICE
IS THE SOLUTION**

THE SOLUTION

Have your vehicle AC system treated with ProTech® AC system service.

ProTech HVAC Universal Charge: Improves the efficiency of all R-134a refrigerant air conditioning systems. It helps extend compressor life by reducing friction and operating temperatures. It provides for an overall quieter and cooler running A/C system.

ProTech HVAC Quiet: A revolutionary new compressor lubricant that enhances cooling, even under the harshest of conditions.

2 Part Kit: 2104-2108
