

DIESEL FUEL SYSTEM SERVICE

AVOID OTHER EXPENSIVE REPAIRS

Diesel vehicles operate under extreme conditions and require specially formulated fluids for proper preventive maintenance. Buildup happens gradually over time robbing your engine of power. Buildup can also lead to costly repairs such as clogged fuel injectors. Your diesel engine should provide the ultimate in power, torque, and towing capability and fuel economy, with ProTech® Diesel canister machine, Diesel fuel system cleaner and Diesel EGR cleaner, the ultimate diesel fuel service products.

USE PROTECH® DIESEL FUEL SYSTEM SERVICE AS A PART OF YOUR REGULAR MAINTENANCE SCHEDULE EVERY 15,000 MILES OR MANUFACTURER'S RECOMMENDED SCHEDULE SERVICE.

**IMPROPERLY FUNCTIONING INJECTOR
BEFORE DIESEL FUEL SERVICE**

THE PROBLEMS

Carbon deposits and contaminants can cause several problems for your vehicle fuel injectors. Problems like poor fuel economy, loss of power, higher emissions, hesitation, rough idling, possible check engine light concerns, knocking and hard starting.

**PROPERLY FUNCTIONING INJECTOR
AFTER DIESEL FUEL SERVICE**

THE SOLUTION

Have your vehicle treated with ProTech® Diesel fuel system service.

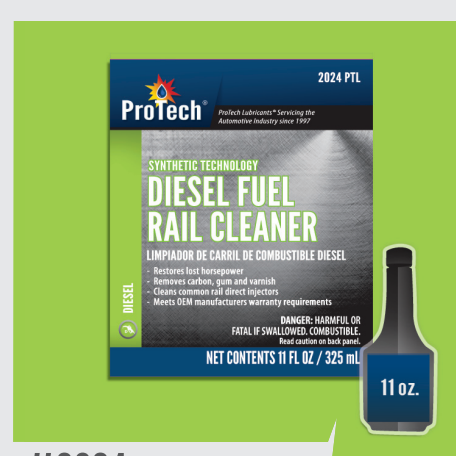

A complete Diesel fuel system service will power flush the fuel injectors for any blockage, de-carbon the throttle plate and chamber, as well as de-carbon the engines valves, pistons and EGR system. The results of performing ProTech® diesel service are easy starting, smooth idling, increased power, eliminate knocking, maximum fuel economy and minimum emissions.
